

# **Invasive Plant Monitoring Workshop - 2016**

## *Spirit Lake Preserve/Pukaite Woods*

### *Saturday, July 16, 10 am – 2 pm*

The Ozaukee Washington Land Trust (OWLT) and the UW-Extension are co-hosting an Invasive Plant Monitoring Workshop. Improve your ID skills and learn how to map invasive plant populations using the Great Lakes Early Detection (GLEDN) mobile application. Spirit Lake, a 155-acre nature preserve features hardwood forest, grassland/prairie, and wetland habitat and is adjacent to the Pukaite Woods of Mequon's larger Rotary Park. See what's in bloom in the prairie, explore the pathless woods, and find out what's lurking around the wetlands!

*Hands-on training provided by Wisconsin Experts.  
Be ready to explore, learn, and network!*

The workshop is part of a Great Lakes Restoration Initiative Grant (GLRI). Follow the link below to learn more about the GLRI.
